Machine Details

1st Step: Hand Disinfection Sanitizer Station:

- Equipped with proximity sensor to detect hands presence & releases the sanitizer dose.
- Equipped with a level sensor to detect the sanitizer’s low level in its jar and signal it.

2nd Step: Boots Cleaning Brushes Ground Station:

- Equipped with 2 lanes of brushes along the unit length to clean the operator’s boots.
- Easy-cleaning mechanical system (Easy to dismantle & clean underneath).
- The brushes rotation is driven by a European-made drive motor.
- Equipped with a water jet underneath the brushes.

3rd Step: Passing Gate Station:

- Programmed to pass/release one person at a time.
- Released only after the Sanitizer sensor is activated and sanitation is done.
